# Projection of UK broadband speeds in Summer 2015

Source: thinkbroadband analysis of technological capabilities and local loop lengths

Revised: Summer 2013

## Technology mix across UK

5% have option of FTTP via Openreach  
 2.5% have option of FTTP/B via Altnet  
 90% have option of FTTC via Openreach  
 50% have option of FTTN via Virgin Media  
 100% access to ADSL2+ or USC Alternative  
 Many elect to remain on ADSL type services due to price/contracts

Once coverage and popularity of 4g is clear it will be added to the projection.

Peak speed

Off peak speed

1Gbps 5%

Figure of 23 million fixed broadband lines allows for growth of 2.7 million lines in next three years

**13.7 Million**

**ADSL2+ and USC services\***  
(Universal Service Commitment)

Speed increasing

Estimates revised down from a peak time speed of 37 Mbps (off peak 45 Mbps) to reflect decrease in FTTP roll-out activity and focus on consumers for lower priced packages

**4.5 Million**  
**Virgin Media**

Mbps

**4.1 Million**  
**Openreach FTTC**

Mbps

**0.2M**  
**Openreach FTTP**

Mbps

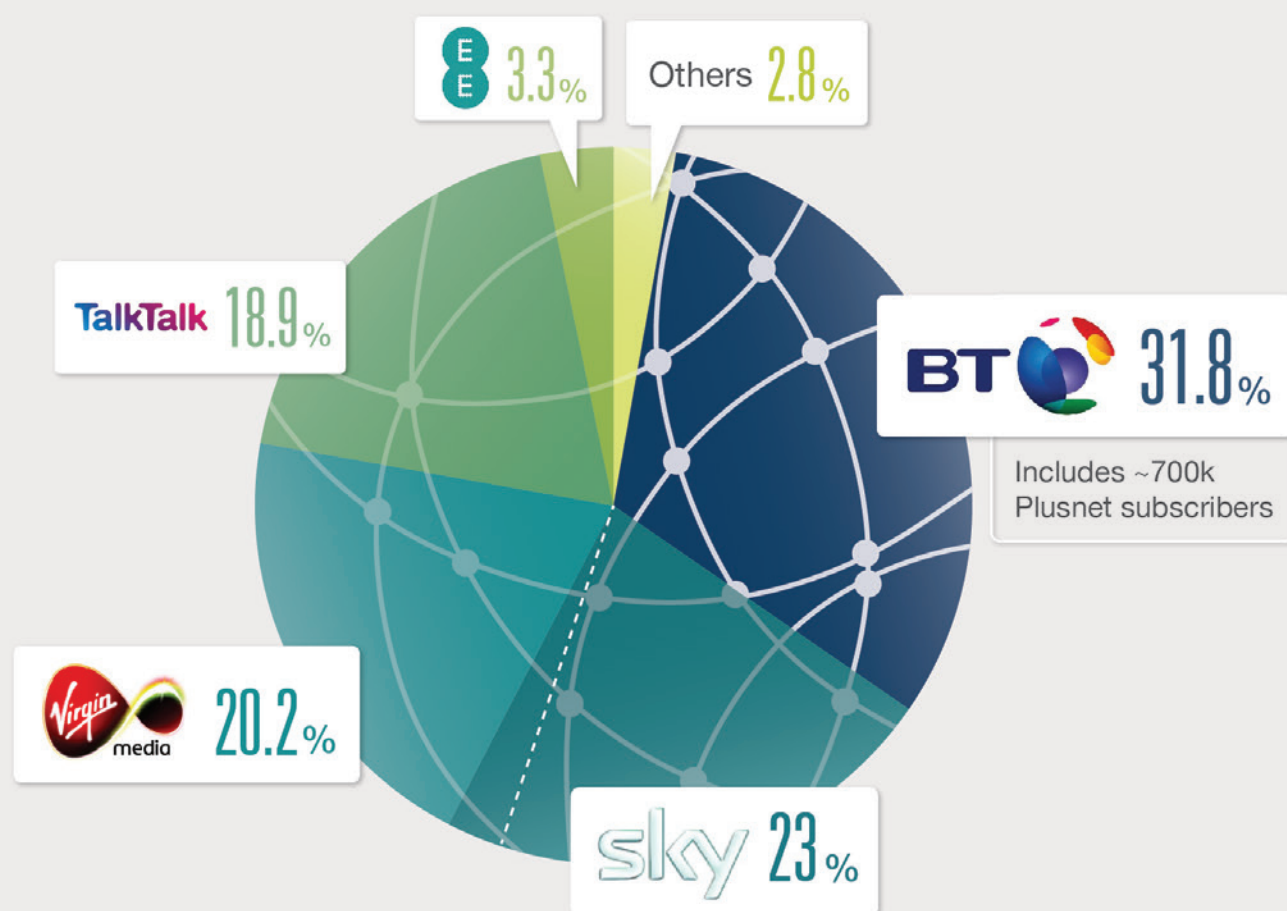

**0.2M**  
**Altnet FTTP/B**

Mbps

## Broadband market share

<b>JAN 2014</b>	DCMS reports 273,731 premises now have superfast broadband available due to BDUK projects. <a href="#">Read more</a>

## About thinkbroadband.com

**thinkbroadband.com** is an independent broadband information website (originally known as ADSLguide.org.uk) started by a group of keen early adopters seeking to share their experience on how to make the most of their broadband services.

The website pioneered **broadband speed testing** and continues to provide a number of innovative tools to help users including a **broadband quality monitor** and a **broadband usage meter** to help users track how much they use their broadband connection. It provides easy-to-understand guides on all aspects of broadband in the home.

The site also provides daily news and commentary on all aspects of broadband in the UK and has a flourishing community of users willing to help each other on a range of technical issues.
